

# OUR STORY

## MADE IN ITALY: CERTIFIED BEAUTY AND QUALITY

Tradition, quality, innovation: these are the strengths of Italian ceramics, a category to which Moma Ceramiche Group belongs by vocation and merit. Identifying with the "made in Italy" brand requires a passion for excellence and a commitment to producing high-quality ceramics entirely in Italy. Creativity, craftsmanship, and attention to detail are key in the competitive global market. Moma Ceramiche Group partners with contemporary design professionals to offer innovative, versatile products for architecture and interior design. Their range of products allows for a variety of design ideas and applications in residential, commercial, and public spaces.

## Cutting Edge Modern Design Solutions

Moma Ceramiche Group positions itself as the partner of contemporary design, striving to provide design professionals with fresh opportunities for creative application in architecture and interior design. Its forward-thinking technological expertise enables the development of a high-performance, adaptable, and innovative product. Through meticulous design processes and refinement, the company's offerings are the culmination of colour research and material and graphic effects that, while unique, allow for versatile application of the collections, facilitating coordination and harmonisation of floor and wall tiling. The extensive product range in the catalogue offers ample scope for reimagining living spaces in various usage scenarios - be it living rooms, kitchens, or bathrooms - and across different settings - residential, commercial, public, or private. The materials, surfaces, finishes, and sizes provided cater to all design concepts and contemporary aesthetic demands.

## A ZERO IMPACT COMPANY

Moma Ceramiche is committed to sustainability, sourcing local ceramic clays and recycled materials to minimise environmental impact. Their state-of-the-art furnaces reduce energy consumption and CO2 emissions, with a 70% decrease in energy usage achieved through continuous innovation. The company adheres to strict emissions standards, utilizes water-saving practices, and prioritizes employee safety through comprehensive training and equipment maintenance. Moma Ceramiche's dedication to environmental protection extends to their products, with ceramics being an inert, recyclable material made from natural elements, contributing to a sustainable economy. Through investments in innovation and advanced technologies, Moma Ceramiche ensures high production performance that is environmentally sustainable and safe for workers.
